Data as of 28. November 2025

Berenberg EM Local Bonds R D

Actively managed fixed income fund

Investment Strategy

Taking account of economic conditions and capital markets as well as the development of equity markets, the fund has a minimum investment of 51% in non-Euro denominated fixed income securities. These can include the money market instruments of sovereigns, corporates and financial institutions. The investment strategy focuses on liquid bonds denominated in currencies other than Euro. Bond issuers are typically located in countries that score highly on key macro economic indicators such as indebtedness, inflation and economic activity. The fund is actively managed with regard to duration, issuers and currency exposures. Strong currency fluctuations may be hedged temporarily at the fund managers discretion. The fund's currency is Euro. Active approach, i.e. index weights have no influence on individual stock selection. Name of the fund until 23.11.2023: Berenberg Global Bonds.

Fund management comment

Economic data published after the US government reopened provided little new insight. Expectations of interest rate cuts in the US rose again at the end of November after Fed members signaled a further cut in December. US interest rates fell by up to 10 basis points accordingly. Emerging market currencies performed slightly positively against the US dollar. Yields on local currency bonds from emerging markets also declined slightly and remain attractive due to their high real yields. The Berenberg EM Local Bonds posted a positive performance of 0.3% in November. The benchmark universe also performed positively, gaining approximately 0.79%.

Opportunities:

- Asset preservation, primarily achieved through interest income, dividends and price gains
- Stabilization of assets in negative capital market phases through professional risk management and intelligent diversification
- Improvement of the risk/return profile through active management across all bond segments

Risks

- Substantial fluctuations in value and significant price losses possible
- Currency losses due to exchange rate fluctuations
- Limited participation in positive performance of individual bond segments due to broad diversification and negative selection effects in individual security and fund selection

Further details on the opportunities and risks of this fund can be found in the sales prospectus.

Returns on investments in foreign currencies may increase or decrease due to currency fluctuations. The purchase, holding, conversion or sale of a financial instrument, as well as the use or termination of an investment service, may give rise to costs that affect the expected income. In the case of investment funds, you should always make an investment decision on the basis of the sales documents (key information document, presentation of past performance, sales prospectus, current annual, if applicable, semi-annual report), which contain detailed information on the opportunities and risks of the relevant fund. An investment decision should be based on all characteristics of the fund and not just on the sustainability-related aspects. Sustainability related disclosures can be found at www.berenberg.de/en/esg-investments. In the case of securities for which a securities prospectus is available, investment decisions should always be made on the basis of the securities prospectus, which contains detailed information on the opportunities and risks of this financial instrument, otherwise at least on the basis of the product information document. A fund investment involves the purchase of shares in an investment fund, but not a specific underlying asset (e.g. shares in a company) held by that fund. The fund is subject to increased volatility as a result of its composition/the techniques used by Fund management; therefore, unit prices may increase or decrease significantly within short periods of time. BVI method: The charts and tables regarding performance shown here are based on own calculations according to the method developed by the German Investment Funds Association (BVI). They illustrate past performance. Future performance can deviate both positively and negatively from these calculations. Gross performance (BVI method) takes into account all charges at fund level (e.g. management fee), net performance plus the issue surcharge. Additional charges can arise for individual investors (e.g. custody account fees, commissions and other fees). Model calculation (net): An investor wants to purchase fund units for EUR 1,000 Euro. Considering a max 3.00. issue surcharge of 3.00 he has to pay EUR 30.00 Euro for the purchase. Also, fees may be charged for the administration of the safe custody account, which will lower the performance. Past performance is not a reliable indicator of future performance.
